

Catamount Pond

Survey Date: September 5, 2019

Last Surveyed: 2014

Lake Description

Catamount Pond is 103.07-acres and has 1.99-miles of shoreline. It is located in the town of Piercefield, St. Lawrence County and lies in the Raquette River watershed. The team launched one canoe on the Massawepie Conservation Easement tract.

Aquatic Invasive Plant Presence

No invasive plants were detected.

Native Plant Biota

Comprehensive surveys of all the native plants found within the pond were not prioritized in 2019. A combination of native floating and submerged plants was detected. These species include: *Potamogeton epihydrus* (ribbon leaf pondweed), *Brasenia schreberi* (watershield), *Nuphar variegata* (yellow pond lily), *Nymphaea odorata* (white water lily), *Utricularia vulgaris* (common bladderwort), and *Pontederia* spp. (pickerel weed).

Aquatic Invasive Animal Presence

Sediment sieves were taken to determine the presence of *Corbicula fluminea* (Asian clams). None were found. Three plankton tows were also conducted with no invasive zooplankton detected.
