

## Lake Narrative

### Edgecomb Pond

Survey Date: August 23, 2018

#### *Lake Description*

Edgecomb Pond is 35.47 acres. It is located in the town of Bolton, Warren County and lies in the Lake Champlain Watershed. The team launched at the public hand launch adjacent to the Town of Bolton Water Supply.

#### *Aquatic Invasive Plant Presence*

No invasive plants were detected.

#### *Native Plant Biota*

Comprehensive surveys of all native plants found within the pond were not prioritized in 2018, as this data had been previously collected in 2015 when the lake was first surveyed. Few plants were detected in Edgecomb Pond due to a steep near-shore drop-off and small littoral zone. *Eriocaulon* spp. (pipewort) was the most common plant detected.

#### *Aquatic Invasive Animal Presence*

Sediment sieves were taken to determine the presence of *Corbicula fluminea* (Asian clams). None were found. Three plankton tows were also conducted with no invasive plankton detected.

### Edgecomb Pond Aquatic Plant Survey 2018

County: Warren      Date Surveyed: 08/23/2018  
 Town: Bolton      AIS Bed Area (acres): 0  
 Lake Area (acres): 35.47      AIS Observed:

Not Surveyed

Native Beds      Invasive Beds

Phytoplankton Tow      Sieve Sample

Native Vegetation Biovolume (%)	Invasive Plant Density (%)
< 1	< 1
1 - 10	1 - 10
11 - 25	11 - 25
26 - 50	26 - 50
51 - 100	51 - 100
