

White Lake

Survey Date: July 10, 2019

Last Surveyed: 2015

Lake Description

White Lake is 240.61-acres and has 6.31-miles of shoreline. It is located in the town of Forestport, Oneida County and lies in the Black River watershed. The team launched a motorboat and a canoe with a trolling motor at the White Lake Association's private launch off NY-Route 28.

Aquatic Invasive Plant Presence

No invasive plants were detected.

Native Plant Biota

Comprehensive surveys of all native plants found within the lake were not prioritized in 2019. A combination of native floating, submerged, and emergent plants was detected. These species include: *Brasenia schreberi* (watershield), *Nuphar variegata* (yellow pond lily), *Nymphaea odorata* (white water lily), *Eriocaulon* spp. (pipewort), *Potamogeton natans* (floating leaf pondweed), *Potamogeton epihydrus* (ribbon leaf pondweed), *Potamogeton amplifolius* (large leaf pondweed), *Utricularia vulgaris* (common bladderwort), *Utricularia purpurea* (large purple bladderwort), *Elodea canadensis* (common waterweed), *Nitella* spp., *Eleocharis* spp. (hairgrass), *Sagittaria graminea* (grassy arrowhead), *Sparganium* spp. (bur-reed), and *Pontederia* spp. (pickerel weed).

Aquatic Invasive Animal Presence

Sediment sieves were taken to determine the presence of *Corbicula fluminea* (Asian clams). None were found. Three plankton tows were also conducted with no invasive zooplankton detected.
